Weigh Dispense

Automatic dosing from bulk volume to final packaging set point weight. A portable IBC/ Bin containing product is placed on the receiver section to automatically dock to the dispensing device. The desired dose weight is entered on the control interface and the system is started to accurately fill the final package to set point weight.

From food to chemical to pharmaceutical, Custom Powder Systems and Integrated Containment Systems serve a multitude of industries as a leading provider in Dry Material Handling/Process Equipment. We design, manufacture, integrate, and test all of our systems in-house and our highly experienced technical services team will respond quickly to any need that arises. Whatever the material handling question, we've got the answer.
